See how Cash Practice can help you  
grow Loyal Patients!

## The Wellness Score®

Loyal patients need feedback on how they're progressing with care. Patients just get it when you show them the need for your products and services with report cards.

## Auto-Debit System®

Loyal patients need convenience, ease, and a frictionless payment experience. Automatically collect credit card and ACH payments for one-time and recurring payments.

## Care Plan Calculator®

Loyal patients need a game plan. Offering care plans with affordable payment options gives them the peace of mind to know their commitments.

## Drip-Education® System

Loyal patients need to hear from you frequently. Consistently educate, market and communicate with your patients using automated email marketing campaigns.

*"One of many things that I love in the Cash Practice software is The Wellness Score System. This tool transformed my practice. It allows us to take all the measurements that we would generally get on the first patient visit and then easily plug it into the software and quickly produces a letter grade that people understand using an A to an F grading system. We show the report card to the patient, and now we can easily explain their health. Patients understand how our care will help them, making it easy for them to enroll in care. Do yourself a favor and get a Cash Practice demo today!"*
